(54) COMMUNICATION NETWORK SYSTEM AND SERVER DEVICE AND TERMINAL DEVICE OF THE COMMUNICATION NETWORK

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a communication network system which can evade the concentration of communication connections on one server device by sending and receiving emphasized data to and from a nearby server device.

SOLUTION: When a portable terminal device 12-4 sends a request for local information to a server device 10-1 sending the local information to portable terminal devices 12-1 and 12-2, a communication-connected server device 10-2 is decided as a communication server and the local information is sent to the portable terminal device 12-4 through this server device 10-2.
